DT™ - Indoor cellular signal booster kit for multiple rooms

The Wilson Electronics DT™ cellular signal booster improves coverage – including 3G and 2G data downloads – for subscribers of all North American cellular networks. For specific information about frequency bands, see below.

It is designed to amplify cellular signals for multiple rooms inside your home or office. The DT provides reliable voice and data coverage inside today's energy efficient but cellular unfriendly buildings.

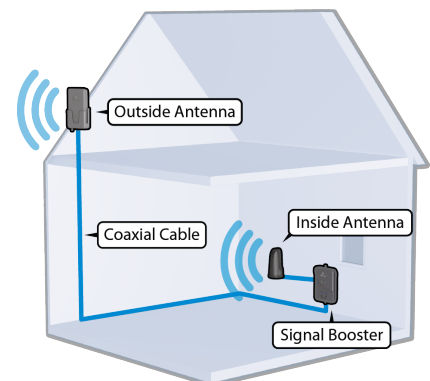

The DT supports multiple simultaneous connections, and works with all cellular devices. Everything you need is in the box, so you can set it up yourself in minutes. As a result, you'll see significantly fewer dropped calls and lost connections, faster data downloads, and a stronger, more reliable cell signal. The DT has an MSRP of \$299.99.

BENEFITS

- Stronger cell signal indoors
- Fewer dropped calls & lost connections
- Faster data downloads
- Clearer voice calls
- Longer battery life for cellular devices

FEATURES

- FCC certified to 2014 technical specs
- Boosts voice & 3G data signals for all major North American cell carriers
- U.S.-based tech support & customer service
- All needed components included in package
- DIY installation
